Online Food Portal is the solution that will allow you to build your own online restaurant portal. What's so special about this service? It is specifically targeted for dealing with the intricacies of presenting an online menu, it allows full control and it allows you to build your own website from scratch. Together with the intuitive interface and the easy to use backend you have all you need to bring your food business online.

Absolutely each aspect of the complex business that is an online restaurant is covered and optimized:

- Smart Zip Code Lookups
- SECURE Faxing (send credit cards directly to store)
- Voice Notifications
- Google Maps Integration
- Complete Billing System. (Percent of Sale OR One Fee Per Month)
- Robust Food Topping Backend
- Banner AD System. You Can Sell AD Space.

But how does this software actually work?

What you have here is a service that will give you an unprecedented freedom in defining your online business and at the same time one that ensures that your online presence will meet the highest standards.

Rest assured though that you will benefit from a great deal of support and experience from our part and that this complete service literally fills all the gaps. From the customer ordering something to the delivery boy nothing is left to chance or to human error. This is a solution that is both integral and stable and which allows you to obtain instantly an edge over your competitors. This is the solution that your online business needs NOW.
